Functional Informatics in Drug Discovery (Drug Discovery Series)

Functional Informatics in Drug Discovery (Drug Discovery Series)

Integrating various technologies with informational systems provides vast improvements to the overall research and development that occur in the biopharmaceutical industry. One of the first books to explore this area, *Functional Informatics in Drug Discovery* examines all aspects of technology integration and information flow in a biopharmaceutical enterprise and outlines the specific technologies used at various stages of drug development.

With contributions from leaders in academia, information technology, and the pharmaceutical industry, each chapter illustrates how a particular area of biological science can benefit from the tools of informatics. The book first looks at intelligent automation, neurally based computational tools, and pharmacodynamic (PD) biomarkers. It then reviews a variety of novel technologies and approaches presently used in drug discovery at Johnson & Johnson. The text also describes how informatics can advance antibody technology and drug development for oncology. After focusing on forward genetic and reverse genetic strategies to identify relevant target genes for drug discovery, the book explains proteomic expression profiling and explores the application of laser microdissection in transcriptomics.

Taking a systematic approach, this volume examines the impact of informatics tools on various areas in biopharmaceuticals by presenting in-depth analyses of emerging trends and future opportunities.

Daniel E. Levy, editor of the *Drug Discovery Series*, is the founder of DEL BioPharma, a consulting service for drug discovery programs. He also maintains a blog that explores organic chemistry.

From reader reviews:

Lawrence Howe:

Do you have favorite book? When you have, what is your favorite's book? Book is very important thing for us to learn everything in the world. Each reserve has different aim or goal; it means that e-book has different type. Some people sense enjoy to spend their time for you to read a book. These are reading whatever they have because their hobby will be reading a book. Consider the person who don't like studying a book? Sometime, man or woman feel need book whenever they found difficult problem or exercise. Well, probably you will want this Functional Informatics in Drug Discovery (Drug Discovery Series).

Ismael Soliz:

What do you think about book? It is just for students since they are still students or that for all people in the world, what the best subject for that? Just simply you can be answered for that problem above. Every person has various personality and hobby for each and every other. Don't to be pressured someone or something that they don't want do that. You must know how great as well as important the book Functional Informatics in Drug Discovery (Drug Discovery Series). All type of book are you able to see on many resources. You can look for the internet solutions or other social media.

Claudette Everett:

Playing with family in a very park, coming to see the water world or hanging out with friends is thing that usually you may have done when you have spare time, and then why you don't try matter that really opposite from that. 1 activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you have been ride on and with addition associated with. Even you love Functional Informatics in Drug Discovery (Drug Discovery Series), it is possible to enjoy both. It is very good combination right, you still want to miss it? What kind of hangout type is it? Oh can happen its mind hangout people. What? Still don't buy it, oh come on its referred to as reading friends.

Jillian Harrington:

As a student exactly feel bored to help reading. If their teacher expected them to go to the library or make summary for some book, they are complained. Just small students that has reading's heart or real their leisure activity. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading critically. Any students feel that looking at is not important, boring in addition to can't see colorful photos on there. Yeah, it is to get complicated. Book is very important to suit your needs. As we know that on this age, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Functional Informatics in Drug Discovery (Drug Discovery Series) can make you experience more interested to read.
