Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies (Chapman & Hall/CRC Biostatistics Series) Mark Chang

Helping you become a creative, logical thinker and skillful "simulator," **Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies** provides broad coverage of the entire drug development process, from drug discovery to preclinical and clinical trial aspects to commercialization. It presents the theories and methods needed to carry out computer simulations efficiently, covers both descriptive and pseudocode algorithms that provide the basis for implementation of the simulation methods, and illustrates real-world problems through case studies.

The text first emphasizes the importance of analogy and simulation using examples from a variety of areas, before introducing general sampling methods and the different stages of drug development. It then focuses on simulation approaches based on game theory and the Markov decision process, simulations in classical and adaptive trials, and various challenges in clinical trial management and execution. The author goes on to cover prescription drug marketing strategies and brand planning, molecular design and simulation, computational systems biology and biological pathway simulation with Petri nets, and physiologically based pharmacokinetic modeling and pharmacodynamic models. The final chapter explores Monte Carlo computing techniques for statistical inference.

This book offers a systematic treatment of computer simulation in drug development. It not only deals with the principles and methods of Monte Carlo simulation, but also the applications in drug development, such as statistical trial monitoring, prescription drug marketing, and molecular docking.

From reader reviews:

Doreen Wolf:

Have you spare time for a day? What do you do when you have far more or little spare time? Yep, you can choose the suitable activity with regard to spend your time. Any person spent their own spare time to take a go walking, shopping, or went to the actual Mall. How about open or read a book eligible Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies (Chapman & Hall/CRC Biostatistics Series)? Maybe it is to be best activity for you. You already know beside you can spend your time with your favorite's book, you can more intelligent than before. Do you agree with the opinion or you have some other opinion?

Cierra Persaud:

Spent a free a chance to be fun activity to accomplish! A lot of people spent their free time with their family, or all their friends. Usually they undertaking activity like watching television, going to beach, or picnic inside park. They actually doing same thing every week. Do you feel it? Do you wish to something different to fill your free time/ holiday? Can be reading a book could be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of guide that you should read. If you want to try look for book, may be the publication untitled Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies (Chapman & Hall/CRC Biostatistics Series) can be good book to read. May be it is usually best activity to you.

Dianne Janelle:

Are you kind of busy person, only have 10 or even 15 minute in your time to upgrading your mind talent or thinking skill even analytical thinking? Then you are having problem with the book in comparison with can satisfy your short space of time to read it because pretty much everything time you only find reserve that need more time to be learn. Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies (Chapman & Hall/CRC Biostatistics Series) can be your answer given it can be read by a person who have those short time problems.

Amanda Young:

Reading a guide make you to get more knowledge from this. You can take knowledge and information from the book. Book is written or printed or highlighted from each source this filled update of news. In this modern era like at this point, many ways to get information are available for you actually. From media social like newspaper, magazines, science book, encyclopedia, reference book, new and comic. You can add your understanding by that book. Are you hip to spend your spare time to open your book? Or just in search of the Monte Carlo Simulation for the Pharmaceutical Industry: Concepts, Algorithms, and Case Studies (Chapman & Hall/CRC Biostatistics Series) when you necessary it?
