G.F. Bonham-Carter

Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences) G.F. Bonham-Carter

This valuable reference book is unique in its coverage of examples from the geological sciences, many centred on applications to mineral exploration. The underlying principles of GIS are stressed and emphasis placed on the analysis and modelling of spatial data with applications to site selection and potential mapping. The book commences with a definition of GIS and describes a case study of mapping mineral potential. The ways in which spatial data are organized with models (raster, vector, relational) are discussed and data structures, such as quadtrees and topological structures are introduced. Data input including digitizing, geographic projections and conversions is covered together with output (visualization, representation of colour and spatial query). Spatial data transformations are dealt with thoroughly and attention is paid to map analysis and modelling as related to single maps, map pairs and multiple maps respectively. Methods of quantifying the associations between pairs of maps are emphasized. Finally, examples of landfill site selection and mineral potential mapping illustrate the application of map algebra for combining maps and tables with models, employing Boolean logic, index weighting, fuzzy logic and probability methods such as weights of evidence. There is an extensive glossary of terms, and references accompany each chapter. Contains 40 pages of colour illustrations.

From reader reviews:

Jimmy Borrelli:

Nowadays reading books be than want or need but also turn into a life style. This reading practice give you lot of advantages. The huge benefits you got of course the knowledge the particular information inside the book in which improve your knowledge and information. The information you get based on what kind of book you read, if you want attract knowledge just go with schooling books but if you want feel happy read one using theme for entertaining for instance comic or novel. The Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences) is kind of book which is giving the reader erratic experience.

James Drennan:

Playing with family in a park, coming to see the ocean world or hanging out with good friends is thing that usually you have done when you have spare time, after that why you don't try issue that really opposite from that. One activity that make you not sense tired but still relaxing, trilling like on roller coaster you already been ride on and with addition details. Even you love Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences), it is possible to enjoy both. It is good combination right, you still would like to miss it? What kind of hangout type is it? Oh can occur its mind hangout fellas. What? Still don't understand it, oh come on its named reading friends.

Lorna Dews:

Your reading sixth sense will not betray an individual, why because this Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences) publication written by well-known writer whose to say well how to make book which might be understand by anyone who read the book. Written with good manner for you, leaking every ideas and composing skill only for eliminate your own hunger then you still skepticism Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences) as good book but not only by the cover but also with the content. This is one reserve that can break don't determine book by its handle, so do you still needing yet another sixth sense to pick this kind of!? Oh come on your reading through sixth sense already alerted you so why you have to listening to one more sixth sense.

Theresa Tompkins:

You could spend your free time to learn this book this publication. This Geographic Information Systems for Geoscientists: Modelling with GIS: Volume 13 (Computer Methods in the Geosciences) is simple to bring you can read it in the area, in the beach, train in addition to soon. If you did not have got much space to bring the printed book, you can buy typically the e-book. It is make you better to read it. You can save often the book in your smart phone. And so there are a lot of benefits that you will get when one buys this book.
