Clinicians Guide to Evidence Based Practices: Mental Health and the Addictions John C. Norcross, Gerald P. Koocher

All mental health and addiction practitioners want to provide their patients with the most effective treatments. But with this comes the challenge of wading through the overwhelming amount of scientific research and integrating it with clinical expertise and patient values. Here, a trio of distinguished scientist-practitioners provide a concise, user-friendly guide to assist practitioners in implementing evidence-based practices (EBP). Learn the core skills for conducting evidence-based practice through AAA TIE:

DT Ask a specific, clinical question

DT Access the best available research

DT Appraise critically that research evidence

DT Translate that research into practice with a particular patient

DT Integrate the clinicians expertise and patients characteristics, culture, and preferences with the research

DT Evaluate the effectiveness of the entire process No book covers EBPs in mental health as concisely and accessibly as the Clinicians Guide. An accompanying CD features expanded content, interactive examples, and hyperlinked references. The Clinicians Guide does not merely explain EBPs; it gives skills to apply them to better serve patients and improve outcomes. Containing numerous practical examples and following three case vignettes throughout, the Clinicians Guide teaches you how to actualize EBPs in your own practice.
