Innovations in Satellite Communication and Satellite Technology Daniel Minoli

Surveys key advances in commercial satellite communications and what might be the implications and/or opportunities for end-users and service providers in utilizing the latest fast-evolving innovations in this field

This book explores the evolving technical options and opportunities of satellite networks. Designed to be a self-contained reference, the book includes background technical material in an introductory chapter that will serve as a primer to satellite communications. The text discusses advances in modulation techniques, such as DBV-S2 extensions (DVS-S2X); spotbeam-based geosynchronous and medium earth orbit High Throughput Satellite (HTS) technologies and Internet applications; enhanced mobility services with aeronautical and maritime applications; Machine to Machine (M2M) satellite applications; emerging ultra HD technologies; and electric propulsion. The author surveys the latest innovations and service strategies and the resulting implications, which involves:

- Discussing advances in modulation techniques and HTS spotbeam technologies
- Surveying emerging high speed aeronautical mobility services and maritime and other terrestrial mobility services
- Assessing M2M (machine-to-machine) applications, emerging Ultra HD video technologies and new space technology

Satellite communication is an integral part of the larger fields of commercial, television/media, government, and military communications, because of its multicast/broadcast capabilities, mobility, reliability, and global reach. High Throughput Satellites) are expected to revolutionize the field during this decade, providing very high speed, yet cost-effective, Internet access and connectivity anywhere in the world, in rural areas, in the air, and at sea. M2M connectivity, enabled by satellite communications, connects trucks on transcontinental trips, aircraft in real-time-telemetry aggregation, and mercantile ships.

A comprehensive analysis of the new advances in satellite communications, *Innovations in Satellite Communications Technology* is a reference for telecommunications and satellite providers and end-users, technology investors, logistic professionals, and more.

From reader reviews:

James Lapham:

Why don't make it to become your habit? Right now, try to ready your time to do the important act, like looking for your favorite reserve and reading a book. Beside you can solve your trouble; you can add your knowledge by the book entitled Innovations in Satellite Communication and Satellite Technology. Try to make the book Innovations in Satellite Communication and Satellite Technology as your good friend. It means that it can to get your friend when you truly feel alone and beside those of course make you smarter than before. Yeah, it is very fortunated in your case. The book makes you far more confidence because you can know almost everything by the book. So , let us make new experience and knowledge with this book.

Nancy Reese:

Inside other case, little people like to read book Innovations in Satellite Communication and Satellite Technology. You can choose the best book if you like reading a book. Given that we know about how is important the book Innovations in Satellite Communication and Satellite Technology. You can add know-how and of course you can around the world by the book. Absolutely right, due to the fact from book you can recognize everything! From your country right up until foreign or abroad you can be known. About simple issue until wonderful thing you could know that. In this era, you can open a book or maybe searching by internet device. It is called e-book. You should use it when you feel bored stiff to go to the library. Let's examine.

Nellie Nelson:

What do you about book? It is not important along with you? Or just adding material when you really need something to explain what the one you have problem? How about your extra time? Or are you busy man or woman? If you don't have spare time to perform others business, it is give you a sense of feeling bored faster. And you have spare time? What did you do? Every person has many questions above. The doctor has to answer that question due to the fact just their can do that will. It said that about book. Book is familiar in each person. Yes, it is appropriate. Because start from on pre-school until university need this particular Innovations in Satellite Communication and Satellite Technology to read.

David Paras:

Information is provisions for individuals to get better life, information currently can get by anyone with everywhere. The information can be a information or any news even a huge concern. What people must be consider if those information which is inside the former life are difficult to be find than now's taking seriously which one would work to believe or which one the actual resource are convinced. If you find the unstable resource then you understand it as your main information it will have huge disadvantage for you. All of those possibilities will not happen within you if you take Innovations in Satellite Communication and Satellite Technology as your daily resource information.
