A Planet of Viruses

Carl Zimmer

A Planet of Viruses Carl Zimmer

Viruses are the smallest living things known to science, yet they hold the entire planet in their sway. We are most familiar with the viruses that give us colds or the flu, but viruses also cause a vast range of other diseases, including one disorder that makes people sprout branch-like growths as if they were trees. Viruses have been a part of our lives for so long, in fact, that *we* are actually part virus: the human genome contains more DNA from viruses than our own genes. Meanwhile, scientists are discovering viruses everywhere they look: in the soil, in the ocean, even in caves miles underground.

This fascinating book explores the hidden world of viruses—a world that we all inhabit. Here Carl Zimmer, popular science writer and author of *Discover* magazine's award-winning blog *The Loom*, presents the latest research on how viruses hold sway over our lives and our biosphere, how viruses helped give rise to the first life-forms, how viruses are producing new diseases, how we can harness viruses for our own ends, and how viruses will continue to control our fate for years to come. In this eye-opening tour of the frontiers of biology, where scientists are expanding our understanding of life as we know it, we learn that some treatments for the common cold do more harm than good; that the world's oceans are home to an astonishing number of viruses; and that the evolution of HIV is now in overdrive, spawning more mutated strains than we care to imagine.

The *New York Times Book Review* calls Carl Zimmer “as fine a science essayist as we have.” *A Planet of Viruses* is sure to please his many fans and further enhance his reputation as one of America's most respected and admired science journalists.

The copy writer giving his/her effort that will put every word into enjoyment arrangement in writing A Planet of Viruses nevertheless doesn't forget the main stage, giving the reader the hottest and based confirm resource facts that maybe you can be one of it. This great information could drawn you into fresh stage of crucial contemplating.

Eugene Williams:

As a college student exactly feel bored in order to reading. If their teacher expected them to go to the library or to make summary for some guide, they are complained. Just small students that has reading's soul or real their hobby. They just do what the instructor want, like asked to go to the library. They go to presently there but nothing reading critically. Any students feel that examining is not important, boring along with can't see colorful photographs on there. Yeah, it is to become complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we wish. Likewise word says, ways to reach Chinese's country. Therefore , this A Planet of Viruses can make you experience more interested to read.
