Advanced Man-Machine Interaction (Signals and Communication Technology)

Karl-Friedrich Kraiss (Ed.)

Advanced Man-Machine Interaction (Signals and Communication Technology) Karl-Friedrich Kraiss (Ed.)

Contemporary man-machine interfaces are increasingly characterized by multimodality, nonintrusiveness, context-sensitivity, adaptivity, and teleoperability. The implementation of such properties relies on novel techniques in fields such as, e.g., computer vision, speech technology, trainable classifiers, robotics, and virtual reality. This book puts special emphasis on technological aspects of advanced interface implementation. Furthermore it focuses on interface design and usability. For readers with a background in engineering and computer science, most chapters offer design guidelines and case studies, as well as a description of the functioning and limitations of the algorithms required for implementation. In addition, complementary code examples in C++ are given where appropriate. As a special feature the book is accompanied by two easy-to-handle software development environments, which offer access to extensive public domain software for computer vision, classification, and virtual reality. These environments also provide real-time access to peripheral components like, e.g., webcams or microphones, enabling hands-on experimentation and testing.

From reader reviews:

Arthur West:

Spent a free time for you to be fun activity to perform! A lot of people spent their sparetime with their family, or their very own friends. Usually they carrying out activity like watching television, going to beach, or picnic within the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your free time/ holiday? Might be reading a book is usually option to fill your free time/ holiday. The first thing that you ask may be what kinds of reserve that you should read. If you want to attempt look for book, may be the publication untitled Advanced Man-Machine Interaction (Signals and Communication Technology) can be great book to read. May be it could be best activity to you.

Eric Hough:

Would you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try to pick one book that you find out the inside because don't assess book by its protect may doesn't work here is difficult job because you are scared that the inside maybe not because fantastic as in the outside appearance likes. Maybe you answer could be Advanced Man-Machine Interaction (Signals and Communication Technology) why because the wonderful cover that make you consider concerning the content will not disappoint anyone. The inside or content is definitely fantastic as the outside as well as cover. Your reading sixth sense will directly show you to pick up this book.

James Murray:

Beside this Advanced Man-Machine Interaction (Signals and Communication Technology) in your phone, it can give you a way to get more close to the new knowledge or data. The information and the knowledge you are going to got here is fresh through the oven so don't be worry if you feel like an old people live in narrow commune. It is good thing to have Advanced Man-Machine Interaction (Signals and Communication Technology) because this book offers for you readable information. Do you often have book but you seldom get what it's exactly about. Oh come on, that would not happen if you have this within your hand. The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Techniques you still want to miss this? Find this book as well as read it from at this point!

William Looney:

What is your hobby? Have you heard in which question when you got students? We believe that that question was given by teacher on their students. Many kinds of hobby, Every person has different hobby. And you know that little person such as reading or as reading become their hobby. You need to know that reading is very important in addition to book as to be the thing. Book is important thing to add you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Different categories of books that can you choose to use be your object. One of them is actually Advanced Man-Machine Interaction (Signals and Communication Technology).
