Tropical Rain Forests: An Ecological and Biogeographical Comparison Richard T. Corlett, Richard B. Primack

The first edition of *Tropical Rain Forests: an Ecological and Biogeographical Comparison* exploded the myth of 'the rain forest' as a single, uniform entity. In reality, the major tropical rain forest regions, in tropical America, Africa, Southeast Asia, Madagascar, and New Guinea, have as many differences as similarities, as a result of their isolation from each other during the evolution of their floras and faunas. This new edition reinforces this message with new examples from recent and on-going research.

After an introduction to the environments and geological histories of the major rain forest regions, subsequent chapters focus on plants, primates, carnivores and plant-eaters, birds, fruit bats and gliding animals, and insects, with an emphasis on the ecological and biogeographical differences between regions. This is followed by a new chapter on the unique tropical rain forests of oceanic islands. The final chapter, which has been completely rewritten, deals with the impacts of people on tropical rain forests and discusses possible conservation strategies that take into account the differences highlighted in the previous chapters. This exciting and very readable book, illustrated throughout with color photographs, will be invaluable reading for undergraduate students in a wide range of courses as well as an authoritative reference for graduate and professional ecologists, conservationists, and interested amateurs.

From reader reviews:

Dave Edwards:

The publication with title Tropical Rain Forests: An Ecological and Biogeographical Comparison has lot of information that you can learn it. You can get a lot of help after read this book. This book exist new information the information that exist in this guide represented the condition of the world now. That is important to you to know how the improvement of the world. This particular book will bring you within new era of the globalization. You can read the e-book on your smart phone, so you can read the item anywhere you want.

Hannah Norton:

You may spend your free time to read this book this e-book. This Tropical Rain Forests: An Ecological and Biogeographical Comparison is simple to create you can read it in the park your car, in the beach, train along with soon. If you did not possess much space to bring the printed book, you can buy the e-book. It is make you easier to read it. You can save the book in your smart phone. And so there are a lot of benefits that you will get when you buy this book.

Charles Howell:

As a university student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some publication, they are complained. Just little students that has reading's spirit or real their pastime. They just do what the educator want, like asked to the library. They go to there but nothing reading seriously. Any students feel that reading is not important, boring along with can't see colorful pictures on there. Yeah, it is to get complicated. Book is very important for you personally. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country. Therefore this Tropical Rain Forests: An Ecological and Biogeographical Comparison can make you truly feel more interested to read.

Gerald Allen:

What is your hobby? Have you heard in which question when you got learners? We believe that that concern was given by teacher to their students. Many kinds of hobby, Everyone has different hobby. So you know that little person like reading or as reading become their hobby. You should know that reading is very important as well as book as to be the issue. Book is important thing to provide you knowledge, except your personal teacher or lecturer. You get good news or update concerning something by book. Amount types of books that can you choose to use be your object. One of them is Tropical Rain Forests: An Ecological and Biogeographical Comparison.
